

**BSA Engineering Company**

# MANUFACTURER & EXPORTER

- ROTARY AIR LOCK VALVES
- SLIDE GATE VALVES
- DOUBLE FLAP VALVES

**Masters In Industrial Manufacturing  
With 19 Years Of Experience.**

## ABOUT US

Established in the year 2005, we BSA Engineering Company are in to manufacturing of Rotary Airlock Valves, Slide Gate Valves, and Double Flap Valves. We are engaged in manufacturing with ultra-modern machinery and equipment. BSA Make Valves/ Our Catalog Products are well appreciated in the market and are a benchmark for others in the race.

We offer a wide range of Sizes to choose from, ensuring that our customers can find the perfect solution to meet their unique needs. Aiming to always improve our processes and product quality with a focus on technically innovative solutions. We constantly invest in new resources to meet and exceed our customer expectations for innovation, quality and on time delivery.

With this, we request you to provide us an opportunity to works with your esteemed organization to prove our Quality and commitment. We are the most prominent manufacturer of Rotary Airlock Valves, Slide Gate Valves & Double Flap Valves.

We have a complete setup of Conventional & Non-Conventional Machines required for mass production using the latest technology to meet optimum levels.

We serve customers who process bulk materials such as plastic powder, sand, cement, fly ash grain, seeds, cereals, sugar, flour, plastic pellets, fertilizers, value our ability to solve their bulk material handling challenges.

### Mission

- Design, Manufacture and provide Quality Engineered Rotary Airlock Valves, Slide Gate Valves, Double Flap Valves & other Material Handling Systems.
- To be the Industry Leaders in manufacturing of Rotary Airlock Valves, Slide Gate Valves & Double Flap Valves.

### Vision & Values

#### Quality Comes First.

We are adhere to our Quality System we work in and never compromise in any of the process or part in our manufacturing process. "Do It Right The First Time." is the framework we apply on us when we work.

#### Customer Centric Approach

We strive to deliver the right product to the customer. It is very important to understand the customers need, requirement and accordingly deliver the Right Product at right time, every time.

### Industries We Serve

Sugar & Jaggery

Pharmaceutical Industries

Food Processing

Chemical Industries

Cement Industries

Renewable Fuels

Distilleries

Petrol Chemicals

## OUR PRODUCTS

### 1. ROTARY AIR LOCK VALVES

We are manufacturing Rotary Air Lock Valve & Rotary Feeders sizes from 100 mm to 600 mm sizes with established development systems by quality norms. We are manufacturing units as per client requirements. BSA make RAV is highly suitable for controlled discharging and feeding of granular or powder materials from hoppers, pneumatic conveying systems, cyclones, Bag Filters.

#### Technical Specification

Parameter	Value
Design Type	Round & Square
RAV Size	150 mm to 600 mm
Material (MOC)	Cast Iron / SS 304 / MS
Rotor (MOC)	MS Fabricated (Vanes = 08 Nos.)
Drive (Gear - Motor)	0.5 HP to 5 HP
Application	Fly Ash, Cement, Clinker, Sponge, Iron, Coal, Dust, etc.

### 2. SLIDE GATE VALVES

We have gained immense credibility across market by offering a wide range sizes of Slide Gate Valve (SGV). Extensively used in chemical, pharmaceutical and many other industries to control the flow of powder, cement, dust, coal-ash. We at BSA, with various necessities of our valued clients, we provide these valves in numerous sizes and dimensions. These valves gained exceptional value amongst our clients for their striking features.

#### Technical Specification

Parameter	Value
Size	150 mm - 600 mm
Type	Square
Material (MOC)	MS
Automation Grade	Manual / Motorized / Pneumatic
Application	Flow Control / Industrial

### 3. DOUBLE FLAP VALVES

We are passionately engaged in providing an exclusive array of Double Flap Valve that are widely acclaimed in various engineering industries. We at BSA mainly manufacture Counterweight Type & Pneumatic Type.

#### Technical Specification

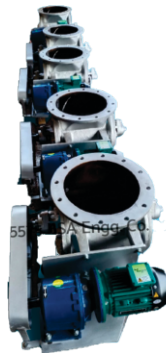

Parameter	Value
Size	200, 250, 350
Material	MS
Automatic Grade	Counterweight type / Pneumatic type
Application	Industrial / Flow control / Cement
